Summary

Prior to deciding I wanted to pursue coding as a career, I spent the last ten years leading financial and maintenance teams for a hospital group in Brazil. During this time, I gained a lot of professional experience which I have no doubt will help me to become a successful software engineer. I have always been curious about development and decided to take some additional courses to further my understanding and I haven't looked back since. I am highly determined and extremely committed to pursuing a career in development.

Work Experience

futureproof, Software Engineer
March 2020 – Present

GitHub : **https://github.com/susanmiss**
Currently on a 13 week training programme covering full stack web development skills, pair-programming and test driven development.
Projects include the following:
Quarantine: https://github.com/susanmiss/quarantine-thoughts
Trip4Me: https://github.com/susanmiss/trip4me
Zombie Movies: https://github.com/susanmiss/zombie-movies

Education

Futureproof Bootcamp - 2020

Software Engineering

23 Code Street - 2019

Web Development Foundation Course

Universidade Federal do Rio Grande do Sul - 2004-2009

Actuarial Science Bachelor degree

Technical Skills

HTML, CSS, JS	Node.js
REACT	Unit tests
API usage	Web Development

Susan Missaglia
SOFTWARE ENGINEER

ABOUT ME

I have been always curious about technology, keen to understand what happens behind the designs we see and what lies beneath every click on an interface.

I decided to change direction within my career to pursue this passion and after completing a web development course, I had no doubt that I wanted to focus my career to working as a developer.

I'm a very dedicated trainee software engineer focused in web development. I have proven expertise in being part of and leading teams.

Outside of work, I enjoy doing travelling, trying different cuisines and playing snooker.
